Sign Off/Revision History

1 Sign Off

The undersigned authorized representative(s) agree(s) that this requirements document accurately describes the requirements and scope of work needed for the View Site by Locale project.

_____ Signature	_____ Signature
_____ Title	_____ Title
_____ Date	_____ Date

2 Revision History

This document is versioned for each release of the document. A change in whole number represents a change in scope or shift in direction, while a change in decimal fraction indicates refinement.

Revision	Date	Author	Comments
1.0	11/11/04	Alice Toth	Initial Creation
1.1	11/15/04	Alice Toth	added in Klee's comments
1.2	11/16/04	Alice Toth	added in Vincent's comments

3 Referenced Documents

Documents listed in this table represent those directly referred to, as well as those that aid in understanding topics discussed.

Title	Author	Location

Glossary

4 Commonly Used Terms

Definitions in the following table are intended to clarify terms and concepts used within this document.

Term	Definition

Purpose and Scope

5 Business Objectives

Allow users to view their site by a specific locale.

6 Stakeholders

The following people have contributed to the creation of this document.

Name	Role	Contact information
Vincent Shih	System Architect	
Alice Toth	Senior UI Architect	
Steve Bendiola	Lead Developer	
Klee Burke	Business Analyst	

7 Scope

The following items are considered in scope for this project:

- View a site from the DRCC
- If site has multiple locales, allow user to choose a specific locale to view

The following items are considered out of scope for this project.

- none

8 Assumptions

The following assumptions were made when analyzing the business objective:

- This feature is available to both internal and external users

9 Risks

The following risks are noted:

- none

Requirements

10 System Requirements

ID	Requirement	Reference
1.	<p><u>Internal User</u></p> <p>When user searches for a site, the site selector in the left nav is unaffected when the results list is displayed.</p>	
2.	<p><u>External User</u></p> <p>If the company has more than one site, user needs to be able to select 'none' in the site selector in the left nav</p>	
3.	<p><u>Permissions</u></p> <p>This functionality will be part of the Site Manager</p> <p>This functionality will be available to all users currently in the system</p>	

11 Business Requirements

ID	Requirement	Reference
1.	<p><u>Internal User</u> – when user clicks on 'View Site':</p> <ul style="list-style-type: none"> • If no site is selected:: <ul style="list-style-type: none"> - user needs to be able to do a search on all sites in the system - search results will display a list of site ids, site names and their locale(s), even if there is only one site, one locale - hyperlink the locale name to the site for that locale • If site is selected, <ul style="list-style-type: none"> - display list of the site id, site name and its locale(s) - user will still be able to do a search on all sites 	<p>GUI 17.1</p> <p>UC 19.1</p> <p>UC 19.2</p>
2.	<p><u>External User</u> – when user clicks on 'View Site':</p> <p>Searching for sites and locale is not available to the External User.</p> <ul style="list-style-type: none"> • If no site is selected, display a list of site ids, site names and their locale(s) available for selected company. • If site is selected and has multiple locales, <ul style="list-style-type: none"> - display a list showing the site id, site name and all locale(s). • If site is selected and has one locale, <ul style="list-style-type: none"> - display the site in a new window 	<p>GUI 17.2</p> <p>GUI 17.3</p> <p>UC 19.3</p>

ID	Requirement	Reference
1.	No new template requirements have been identified for this project.	

15 Notifications

ID	Requirement	Reference
1.	No new notification requirements have been identified for this project.	

16 Functional Overview

16.1 User Flow

17 GUIs

17.1 View Site - Internal User

When an internal user clicks on 'View Site', the Site Locale page is displayed.

If no site is selected, only the search widget is visible and the user will have to do a search. The search results are then displayed at the bottom of the page.

If a site is selected, the search widget is visible and the site and its locale(s) are displayed at the bottom of the page. The Internal User will still be able to do a search on **all** sites.

Site Manager
View Site

Site Manager :: View Site (?) help

Search for a site by entering either a Site Name or a Site ID and clicking on the 'Search' button. The search results will be displayed at the bottom of this page.

Site Name:

Site ID:

Search Results
Click on a specific locale in the below list to view that site in a new window.

Site ID	Site Name	Available Locales
disc	Discreet EU Store	(en_GB)
disc_eur	Discrete Europe	(de_DE Austria) (de_DE Germany) (de_DE Switzerland) (en_GB) (en_IE Belgium) (en_IE Denmark) (en_IE Finland) (en_IE Greece) (en_IE Ireland) (en_IE Italy) (en_IE Luxembourg) (en_IE Netherlands) (en_IE Portugal) (en_IE Spain) (en_IE Sweeden) (fr_FR)
divx	Divix	(de_DE) (en_GB) (en_IE)

Page Notes:

Search results

This area is displayed:

(a) after user does a search

(b) if a site is already selected, the user clicks on 'View Site' in left nav and the selected site has multiple locales

17.2 View Site – External User (site is selected)

The Site Locale page is presented to the external user if a site is selected in the left nav and the selected site has more than one locale. Otherwise, if the selected site has only one locale, when the user clicks on View Site the site is displayed in a new window and this page is not displayed.

NOTE: search widget is not available to external user
